

Overview

The new **Referral Intake** layout is designed to streamline the process of getting a new referral to Triage & Scheduling. Key features include:

The layout

- Documents submitted with the referral will **be automatically converted to PDFs and attached to the case.** **1**
 - PDFs will display open and side-by-side with the input areas.
 - Both the form and the PDF window are **independently scrollable.**
 - This module will also give you access to the **Feed** and **SHI** **2**
 - You can use the Feed to send the referrer a confirmation email when you're done.
- The referral entry process is broken into 3 steps: **3**
 - Checking the patient's name, birthdate and claim to see if the submission is a duplicate or can automatically use existing patient and case information
 - Entering a few details on the referral itself (date and time submitted, who is referring, etc.)
 - An input form for the case details

Field format tips & validation

- Fields will validate once you click away from them and when you save
- Date and phone fields have a hint related to entry format **4**
 - If you type "December 31, 2000" - it will convert to 12/31/2000
- Search results will include helpful additional information (such as Physician fax number or patient birthdate)
- On the Intake form itself, sections will collapse and mark themselves "Done" if you click "Save" and all required fields are complete. If you want to add more info to a completed section, you can expand **6** e section by clicking the carat (>).
- Clicking "Save" on the input form **7** will show which required fields are missing info.

Moving to the next step: Triage

- You cannot move the case to Triage until all required info is entered.** When all required info is entered, the "Next: Triage" button will become active. Clicking it will automatically change the case owner to **Obtain information** and set the status to **Triage**. You will also only see the case in your normal Case page layout.
- If you've looked at all the referral documents and are still missing information, click "Next: Missing Info." The layout will convert to your normal Case page layout and show that there is Missing Information.

Existing Patient Lookup

Search patients...

☒ Create new

* First Name

* Last Name

* Birthday

MM/DD/YYYY

* Claim Number

☒ Enter manually

1

Search for an existing patient using name & birthdate. Existing Claim numbers will be displayed, or you can enter in a Claim number. You can also “Create new” to manually enter the patient info.

Patient

About this referral

* Date Referral Recieved

00/00/0000

* Time Referral Recieved

* Referral Source

* Referrer Name

☐ Create new

* Referral Method

2

Enter in the date, time, source and referral name and method for the referral.

There are 3 steps in the process. All required fields must be filled out at each step.

When all required fields are completed, the case can transition to Triage with a single click.

Enter the remaining detailed information about the patient, claim and case.

If you chose an existing patient or patient + claim, that information will automatically populate into the relevant fields.

Save Next: Triage

Step 1: Check for duplicates

The first step in the Intake process checks if the patient is already in our system. If so, you can choose to automatically transfer patient and case info into the referral form.

First, search for the patient by entering their name in the **Existing Patient Lookup**. Results will display matching names **plus birthdates**: **1**

The screenshot shows the 'Existing Patient Lookup' interface. A search bar contains the text 'zesty'. Below the search bar, a list of results is displayed, each with a patient icon, name, and birthdate. The results are: Alyssa Zestytest 4/10/1990, Alyssa Zestytest 4/10/1990, and Alyssa Zestytest 3/6/1962.

When you choose an existing patient, you will automatically see all claims associated with the patient in the **Claim Number** field below.

The screenshot shows the 'Claim Number' field. It is a dropdown menu with the value '190019918-001' selected. Below the dropdown, a list of claims is shown: 190019918-001 (checked) and 10988098-002. To the right of the dropdown is a checkbox labeled 'Enter manually'.

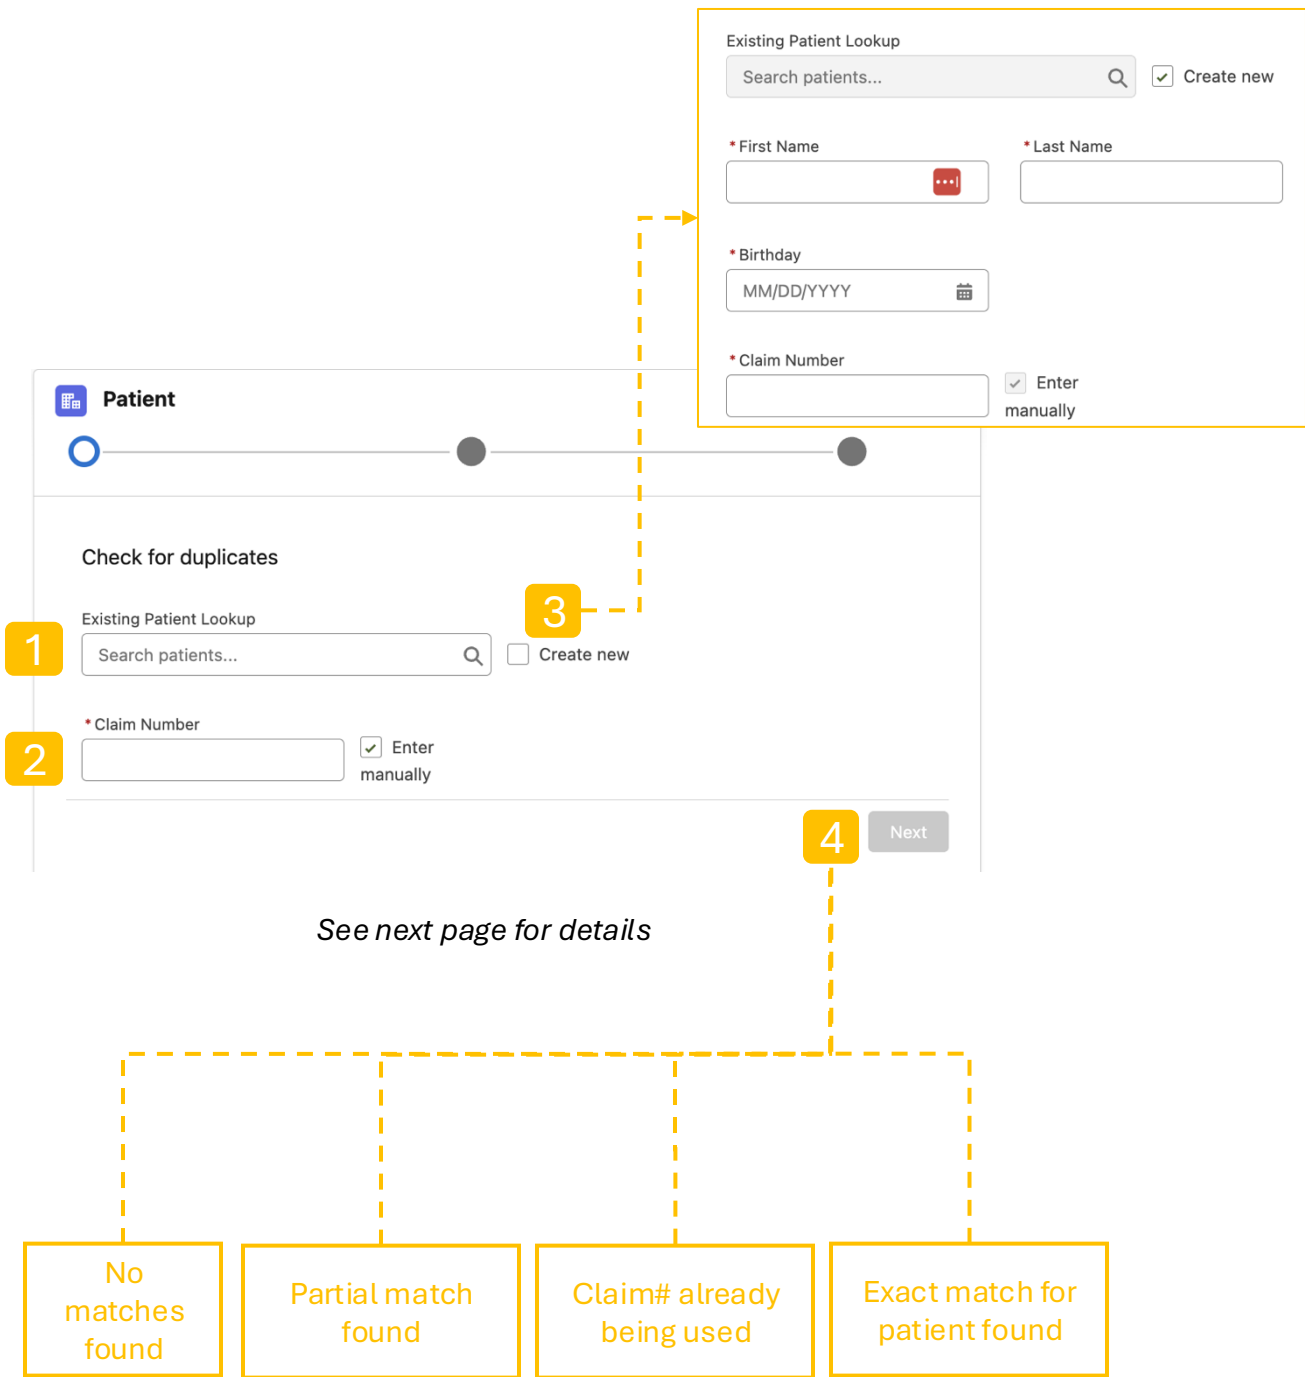

You can choose an existing claim number or, if you don't see a match, click **Enter manually** and type in the new claim number.

If you don't see a match using patient search, click **Create New** **3**) and type in the patient's name, birthdate and claim number.

Click "Next." **4**) Salesforce will check the database for patient and claim matches or partial matches, including:

- No matches were found for the patient and case you entered.
 - In this case, you'll go straight to step 2.
- There is a partial match for your patient and birthdate
- The claim number you entered matches one a different existing patient is using.
- There is an exact match for the patient's name and birthdate you entered.

See the next page for details on these results, and what to do next.

Duplicate check results

Duplicate check results include:

1. No matches found (brand new patient and case):

- You will go straight to **Step 2**.

2. The patient and claim number are already in Salesforce:

- You'll see all the patient cases associated with the claim number. **1**
- You can choose a case to copy info over from (including the injury date, state of jurisdiction, payor, adjuster, nurse case manager and referring physician) or to create a new case. **2**

Cases

Cases already associated to this patient and claim number are shown below.

	Case Number	Case Key	Status	Claim Number
1 ☐	00417601	PT001	Discharged	190019918-001
☐	00557490		Triage	190019918-001

What would you like to do?

2 ☐ Copy info from the case I selected above into the new case
☐ Create a new case without copying any existing case info

If this is not an Intake Case, you can revert it back to Support so another team can process the request.

3. The patient is in Salesforce but the claim number isn't:

- If the patient exists but the claim number does not match any tied to the patient's cases, the system shows the patient's entire case list for reference, including all claim numbers. **3**
- You cannot choose to copy any info from these cases over to the new case since these cases are for different claims.
- You can either create a new case or revert the case back to Support for another team to process.

Cases

Cases already associated with this patient are shown below.

	Case Number	Case Key	Status	Claim Number
3	00417601	PT001	Discharged	190019918-001
	00730332	PT002	Intake	201905568510001
	00557490		Triage	190019918-001

What would you like to do?

☐ Copy info from the case I selected above into the new case
☐ Create a new case without copying any existing case info

If this is not an Intake Case, you can revert it back to Support so another team can process the request.

4. The claim number belongs to another patient:

- If the entered claim number exists but is tied to a different patient, the system displays an error message. You can click "Back" to re-enter the information or revert the case back to Support for another team to process.

Duplicate Claim

An existing patient is already using claim # **WCV001114305**

Click "Back" to change the claim number you entered, or revert this case back to Support so another team can process the request.

5. More than one patient is an exact match (name and birthdate):

- If the lookup finds existing patients with identical names and birthdates but different addresses or phone numbers, the system displays the patients.
- If you check the box next to the existing patient's name, you will see a list of the patient's claims.
- You must choose an existing patient (**4**) to move forward.

An existing patient is an exact match for **Carolyn Hughes - 1974-02-06**. You'll use this patient for the new case.

	Name	Birthdate	Phone	Email	Address
☐	Carolyn Hughes	Feb 5, 1974	(585) 418-4409	test@testing.com	1598 Newcastle Rd,...
4 ☒	Carolyn Hughes	Feb 5, 1974	(585) 418-4409		420 Summer Ave, B...

6. Birthdate matches and patient name partially matches:

- If the name is a partial match (e.g., misspelled), the system displays partial matches on first and last name that have the exact birthdate you entered. You can select the correct patient from the list, click "Back" to re-enter corrected info, revert the case back to Support for another team to process, or indicate that none of the displayed patients is correct (that this is a new patient).

An existing patient is a partial match for **Carolyn Hughess - 1974-02-05**. Please check carefully if this is a duplicate, and if so, select the existing patient instead.

☐	Name	Birthdate	Phone	Email	Address
☐	Carolyn Hughes	Feb 4, 1974			

What would you like to do?

☐ This is not a duplicate patient. **Create a new patient.**

If this is not an Intake Case, you can revert it back to Support so another team can process the request.

Step 2: About this referral

In Step 2, you'll enter in brief information about the referral.

The **date and time referral was received** are automatically populated with the date and time the original Support case was created. **1**

Referral source choices are Adjuster, Employer, Nurse Case Manager, Physician, Therapy Provider, Other and Occupational Medicine Clinic. **2**

- The choice you make here impacts the **Referrer Name** field.
 - It will narrow down the search. For example, if the **Referral Source** is "Adjuster," when you search for **Referrer Name**, you will only be searching for adjusters in our database.
 - It will impact what shows if you check the "**Create New**" box.

"Create new" fields **3**

- New adjuster or nurse case manager** - First name, last name, email (required); phone, fax (optional)

* Case Manager First Name	* Case Manager Last Name	
Case Manager Phone	Case Manager Fax	* Case Manager Email

- New Employer, Therapy Provider or other** - First name, last name. If Other, you must type in who the source is.

* Referrer First Name	* Referrer Last Name	
Referrer Phone	Referrer Fax	* Referrer Email

- New Physician** - First name, last name, phone, fax and NPI

* Physician First Name	* Physician Last Name	
Physician Phone	* Physician Fax	Physician NPI

Referral Method choices are Email, fax, mail, phone, web form, community web form, OCR, ComplIQ, Referral Portal or EHS. **4**

Lastly, if the case is for a patient who is already TIP, check the "**Case is TIP**" box to prevent the automatic intro text from sending. **5**

Step 3: Overview

The last step is entering detailed case information. The following features should make it faster and easier for you to complete this step:

Patient and claim data from the prior step(s) will display automatically and not be editable (1). If you need to edit this info (e.g., name, birthdate, claim number etc) then use the progress line (2) to click back to Step 1.

▼ Patient

Carolyn

Middle Name

1

* Last Name

Hughes

1

* Birthday

2/6/1974

* Mobile Phone

5854184409

* Gender

Male

Referrer name will also auto populate from what you entered in **Step 2**. 3

- If the referrer is an adjuster or nurse case manager, their info will also auto populate as the case’s adjuster or nurse case manager. You can change this if you need to.
 - If the referrer is an adjuster, then “Adjuster” will auto populate in the “**Referral authorized by**” field.

Case carry-over information

- If in Step 1 you chose to copy info over from another case, this info will automatically populate if it existed on the prior case:
 - **Claim** - State of Jurisdiction, Date of injury, Client, Payor plan and Employer at the time of injury
 - **Case** – Physician, Adjuster, Nurse Case Manager
 - **If a different Adjuster or NCM is the referrer on the new case**, then that name will be used instead. 4

Sections will automatically collapse and be marked as complete once all required info is entered and you click “Save.” You can always expand the section to add nonrequired information. Just click the > icon.

> Claim

Done! ✓

Clicking “Save” will show you which sections are incomplete and which required fields are empty.

Required fields:

- PATIENT**
- First name, last name
 - Birthday
 - Mobile phone
 - Gender
 - Primary language (defaults to English)

- CLAIM**
- Claim number
 - Client
 - State of Jurisdiction
 - Payor Plan

- CASE**
- Was prescription/order provided (y/n)
 - Referring physician
 - Body part
 - Diagnosis (can be “unknown”)
 - Service Type
 - Surgical status (can be “unknown”)
 - Auth # of visits
 - Referrer name
 - Referrer authorized by

Step 3: Patient

PATIENT

Patient name

Will automatically populate using what you entered or search for in Step 1. **1**

Mobile phone

Will automatically populate if you selected an existing patient in Step 1. Otherwise, you will need to enter it. **2**

Gender

Will automatically populate if you selected an existing patient in **Step 1**. Otherwise, you will need to make a selection. **3**

Language

Language defaults to English. You can choose a different language if needed. **4**

Address

If you selected an existing patient in Step 1, the patient's address will automatically populate.

If you need to enter an address, the patient address section is now connected to Google maps to ensure addresses are accurate. **5**

- Begin typing an address in the search box. **6**
- You will see a list of matching valid addresses. **7**
- Select one (**8**) and the full address will populate into the street, city, state and zip fields below. Country is automatically set to the US and cannot be changed.
- If you need to add a Unit or Apartment number, type it in the **Street** field. **9**

The screenshot shows the 'Patient' form with the following fields and callouts:

- 1**: First Name (Carolyn)
- 2**: Mobile Phone (5854184409)
- 3**: Gender (Radio buttons for Male and Female)
- 4**: Primary Language (Dropdown menu showing English)
- 5**: Address (Search box)

The form also includes fields for Middle Name, Last Name (Hughes), Birthday (2/6/1974), and a Country field.

This section illustrates the address search process using Google Maps:

- 6**: Search box with '1741 12th Avenue, Mo' entered.
- 7**: List of matching addresses from Google Maps.
- 8**: Selection of '1741 12th Avenue Moline, IL, USA'.
- 9**: The selected address populates the form fields: Street (1741 12th Avenue), City (Moline), State (IL), and Zip (61265). The Country is set to United States.

Step 3: Claim

CLAIM

Claim number

The claim number will automatically populate using what you entered or search for in Step 1. **1**

State of jurisdiction

State of jurisdiction will automatically populate if you chose to carry over info from another case. Otherwise, you must select a state here. **2**

Date of injury

Date of injury is an optional field. To enter it, pick a date on the popup calendar. **3**

- If you chose to carry over info from another case, date of injury will automatically populate here if it existed in the case.

Client

You must search for a client, unless it is carried over from a prior case.

Payor plan

The correct payor plan should be automatically selected based on the **State of jurisdiction** and the **Client**. **5**

- If the system does not automatically select the payor, you can click **Create new** and enter a new payor plan name.

Employer at time of injury

You can search for an employer or click **Create new** if needed. **6**

- If you chose to carry over info from another case, employer will automatically populate here if it was listed on the case you chose.

Work Status & Job Title

If provided, choose the corresponding Work Status and type in the patient's Job Title.

The screenshot shows a 'Claim' form with the following fields and callouts:

- 1**: Claim Number (text input, value: 190019918-002)
- 2**: State of Juris. (dropdown menu, value: Choose a...)
- 3**: Date of injury (calendar picker, value: MM/DD/YY)
- 4**: Client (search input, value: Search clients...)
- 5**: Payor Plans (search input, value: Choose a client and state of juris., with a 'Create new' checkbox)
- 6**: Employer at time of injury (search input, value: Search Employers..., with a 'Create new' checkbox)
- 7**: Work Status (dropdown menu, value: Select an Option) and Job Title (text input)

Step 3: CASE

CASE

Prescription

You must indicate whether a prescription or order was provided with the referral. If it was provided, choose the prescription date from the popup calendar. **1 2**

Referring physician

Search to find a physician, or "Create new" if no results are found. **3**

- When you search for a physician, you will see the physician's name as well as their fax number. **4** This is a great way to ensure you've chosen the correct physician.
- To create new, you must enter the physician's name and fax number. Phone and NPI are optional. ([See image on page 2](#))
- If you chose to carry over prior case information, the physician will be automatically populated.

Body part

- You can easily find and add body parts using the search tool. **5**
 - Begin typing in the body part name. You will see a list of results. **6**
 - Available body parts are:
 - Ankle, Arm, Cervical Spine, Elbow, Fingers, Foot, Forearm, Full body, Hand, Head, Hip, Knee, Lower Leg, Lumbar Spine, Pelvis, Ribcage, Shoulder, SI Joint, Thigh, Thoracic Spine, Thumb, Toes, Wrist.
 - Check the box next to the correct body part. You can check more than one body part box. **7**
 - To find another body part, repeat the search and select process. **8**
 - You can remove a body part by clicking the X next to the body part name. **9**

Diagram illustrating the process of adding multiple body parts to a case:

- Search for a body part (e.g., "an").
- Select the correct body part (e.g., "Ankle").
- Repeat the search for another body part (e.g., "fo").
- Select the correct body part (e.g., "Foot").
- Remove a body part by clicking the X next to the body part name.

Diagram illustrating the CASE form fields and their corresponding numbered callouts:

- Was a Prescription/Order provided?** (Yes/No radio buttons)
- Script Date** (MM/DD/Y' calendar)
- Referring Physician** (Search physicians... field)
- Physician List** (List of physicians: Lowry Jones, Justin Jones, Ilsa Jones)
- Body Part(s)** (Search body parts... field)
- Diagnosis** (Search diagnosis... field)
- Service Type** (Select a... dropdown)
- Requested Service Type** (Text field)
- Surgical Status** (Select an Option dropdown)
- Surgery Date** (MM/DD/Y' calendar)
- Frequency** (5 per week)
- Duration** (weeks)
- Auth # visits** (Text field)
- Total auth** (Text field)
- Prescribed visits** (Text field)
- Referrer Name** (Search referrers... field)
- Referral Authorized By** (Select an Option dropdown)
- Adjuster** (Lisa Fular)
- Nurse Case Manager** (Dana Volner)
- I have sent a confirmation email to the referrer** (checkbox)

Buttons at the bottom: Save, Next: Triage, Next: Missing Info

Step 3: CASE, con't

Diagnosis

To enter a diagnosis, begin typing the diagnosis number into the field, then check the box next to the matching diagnosis number. **1**

- Your selection will display under the search field. **2**
- You can remove the selection by clicking the “X” next to it. **3**
- To enter a second diagnosis, repeat the process by clearing out the search field by clicking the “X” and typing in new search criteria. **4**

*Diagnosis

Q m25 **1**

2 M25 (Other joint disorder, not elsewhere classified) **3**

4 M26

M26 (Dentofacial anomalies [including malocclusion])

M26.0 (Major anomalies of jaw size)

Service type, Requested Service Type, Surgical status and Surgery date **5**

Choose a service type (PT, OT, etc) and enter in any requested service type (such as CHT, Chiro, etc). Choose indicate whether the case is surgical. If you choose “Unknown” for surgical status, this will appear as “Missing Information” when the case goes to Triage. If provided, enter a surgery date.

Frequency, Duration and Authorization **6**

- If available, enter the frequency (number of visits per week) and duration (number of weeks).
- Enter the number of authorized and total authorized visits.

If the client is Lowes, these fields will auto-populate based on if the case is surgical or not.

Referrer information **7**

The referrer’s name will be carried over from what you entered in **Step 2**.

- If the referrer is an adjuster, “Referral Authorized By” will automatically show “Adjuster.” Otherwise, enter the role of the person who authorized the referral. This is required information.

Other stakeholders **8**

If the adjuster or nurse case manager is the referrer name, their name will also auto-populate here. Otherwise, you can search for or enter (“Create new”) an adjuster or nurse case manager. **9**

Confirmation email sent checkbox

- **You can send the confirmation email right from this screen!** (See steps on the next page). Check to confirm you did this. **9**

10

Sending the confirmation email

Sending emails during Intake

Because the new Referral Intake puts the module that holds **Files, Feed & SHI** side-by-side with the Input form, you can send emails without moving away from the screen.

1. On the left-hand side of the page, click the **Feed** tab. **1**
2. Click the **Email** subtab. **2**
3. Follow your normal steps for sending emails (choosing email templates, etc)

Other “Left-hand side” features

The left-hand module includes lots of useful features. You can

- View the **Feed**.
- Access features within the Feed tab, including email, tasks and call logs.
- View files submitted with the referral
 - These are now automatically converted to PDFs and attached to the Referral case.
- Consult Special Handling Instructions (SHIs)
- Click the SHI tab to see any SHIs related to the referring client.

The screenshot displays the Referral Intake interface. At the top, a case header shows 'Case 00730305' with 'Delete' and 'Click to Call' buttons. Below this, the 'Feed' tab is selected, indicated by a yellow box and a '1'. The 'Email' subtab is also selected, indicated by a yellow box and a '2'. The 'Email' section contains fields for 'From' (Debbie Seusy <dseusy@bardavon.com>), 'To' (mshiner@bardavon.com), 'Cc' (ra1743898355455@00DEI00000...), 'Bcc' (dseusy@bardavon.com), and 'Subject' (Carolyn Hughes 00730305). Below these fields is a rich text editor with various formatting options. To the right, the 'Patient' section shows the 'Case Owner: Dan Robison' and a 'Patient' dropdown with a 'Done!' button. The patient information includes 'First Name: Carolyn', 'Middle Name', 'Last Name: Hughes', 'Birthday: 2/6/1974', 'Mobile Phone: 5854184409', 'Gender: Male', and 'Primary Language: Manx'. The 'Address' section is partially visible at the bottom.
